seidor service Industry with projects
and inventory control

SAP
Platinum
Partner

Oriented to service industry with projects and inventory control —

Oil and gas, construction, utilities, energy companies, etc. which are looking for their common goals: delivering projects on-time and within budget, tracking processes, managing inventory and resources, identify potential red flags ahead of time and others by having access to real time project information.

- Client contracts managed by project
- Inventory purchased and stored centralized or decentralized
- Project execution management integrated with finance, purchasing, warehousing and sales.
- Assets under construction management
- Management of resource and material cost compared with revenue
- Budgets management by project
- Actuals vs budgets in real time by project
- Resource allocation by projects and service level agreement
- Employee agenda and time sheets
- Financial and resource analysis/reports by projects: project accounting
- Optional app for reporting, document distribution, time entry and activity confirmation in the field.

Industries

Maintenance, repair and operation companies (MRO); subcontractors to energy, construction, oil and gas, utility sector, HVAC and other services based companies who need to handle inventory.

Type of companies

Companies who want to optimize resource allocation, control project progress, deliverables and billing in real time while keeping track of project margin, inventory, purchasing and subcontractors, while having its business processes integrated with the BackOffice.
