

# SAP Hosted Cloud For SAP® Business One

## Streamline Processes and Gain Business Insights in the Cloud

SAP Business One cloud is an affordable, easy-to-use business and operational management software solution. Containing integrated financials, sales/CRM, inventory, purchasing, and operations functionality – this solution is perfect for small and midsize companies looking to streamline their business.

By accessing SAP Business One cloud using a software-as-a-service model, you can focus on your business, not your technology.

Because you don't need to invest in hardware infrastructure or experienced IT experts to manage and support the solution, the total cost of ownership is kept to a minimum.

Costs are affordable, easy to understand, transparent and predictable. Payment terms are based on the number of users and the length of your contract, starting at 12 months. So you can tailor the terms to fit the precise needs of your business.

Containing comprehensive, secure cloud-based functionality SAP Business One delivers everything you need to manage your most critical business functions. Including mobile apps to provide access to your business data when and where you need it.

Seidor USA is a local partner for SAP Business One. We are certified to sell, install, implement and train on this solution.

 SAP Business One

## SAP Business One Profile

### Does Your Company Match This Profile:

- Small or midsize company
- Industry segment: Wholesale distribution, Service, Retail or light Manufacturing
- Minimum 3 Professional users

### If Your Company Can Say Yes to Any:

- Outgrowing an accounting-only application
- Has disparate sets of data
- Experiencing business growth
- Has sites in multiple locations / countries
- Has light to no IT staff
- Are a subsidiary or satellite operation with a parent company (using SAP enterprise)

### Then SAP Business One Is A Fit

- SAP Business One is solid technology from the world's leader in business software -- SAP
- Software that is priced and sized for companies just like yours

*Affordable and Easy to Use*

# SAP Business One Functionality

SAP Business One cloud delivers everything you need to manage your most critical business functions. It enables you to standardize and streamline processes, while you minimize errors and delays.

To help you make decisions faster than ever, SAP Business One cloud runs on the SAP HANA platform, so you can be confident that your business decisions are based on the latest information.

Automatic updates to your cloud environment deliver the benefit of ongoing innovation as SAP consistently enhances and improves the business solution.

## Cloud Benefits

- **Improve access to real-time management information for decision making**
- **Standardize processes, and eliminate duplicate data entries, errors and delays**
- **Free up cash spent on acquiring hardware and software**

**Manage an entire business end-to-end across sales, customers, purchasing, inventory, operations, financials and more -- all in a single system**
