

Oriented to light retail companies

When consumers act, they act fast. Today retailers are conscious that they need to act in the moment to harness opportunities for profitable growth by having real time information. Seidor Light Retail Package is oriented to companies who want to gain insights into customer behavior, want to have complete information on the available stock in each store and centralized manage pricing and promotions to be able to deliver personalized experience, manage inventory, anticipate demand and more.

- POS integration or an already integrated SAP POS
- Product sourcing cost management
- Product planning and replenishment
- Inventory management
- Supplier contract management
- Business planning consolidation from various retail locations

Industries

Retail

Type of companies

Retail Companies with several small Point of Sales which sell own products, represents other brands and/or have bought franchises.

Implementation Services via Cloud Factory

The project is expected to be executed mainly remotely through our Implementation factory, with a local consultant travelling to the customer office to attend inside activities.

- The cloud implementation factory is designed to be rapid (delivery in 90 days or less)
- Repeatable and affordable
- Complemented by Seidor's differentiated industry and horizontal solutions
- It has sufficient capacity and capabilities to deliver 90% of the project at scale remotely across the globe.
- You can grow unlimited with the SAP ByD solution

Package details

Time and effort estimations are based on the following assumptions:

Geographical and Organizational Scope

Number of legal entities: 1

Number of sales offices: up to 5 stores
(contact us if you have more. We can do it)
